Office Action Summary	Application No. 10/083,855	Applicant(s) SCHULTE, MICHELINE 	
	Examiner Bryon P. Gehman	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election of Group I, claims 1-21 in the paper filed July 29, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koptis (6,007,264) in view of Smith et al. (5,242,433). Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lustbader et al. (2003/0118535) in view of Smith et al. ('433). Koptis and Lustbader et al. each disclose a hair removal system from the skin including a hair removal solution (see col. 15, lines 39-53; page 1, section 0002; respectively) and a package (3; page 1, section 0011). Smith et al. discloses an application system for applying solution to the skin including a first pad (20) and a package (10). To modify the system of either one of Koptis and Lustbader et al. employing the application teaching of Smith et al. would have been obvious in order to easily apply solution to the skin via a pad, as suggested by Smith et al..

As to claims 2-3 and 13-14, Smith et al. disclose the pad to be of a porous material (see col. 5, lines 43-52).

As to claims 4 and 9, Smith et al. disclose a package including first and second pieces of material (14 and 12 or one of 12' and 12").

As to claims 5 and 10, Smith et al. disclose a package including a third piece of material (the remainder of 12' and 12").

As to claims 6 and 11, Smith et al. disclose impregnating the pad (20) with solution.

As to claims 7 and 12, Smith et al. disclose a second pad (22).

As to claim 8, the package is sealed.

4. Claims 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koptis in view of Smith et al. ('433). Claims 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lustbader et al. in view of Smith et al. ('433). Koptis, Lustbader et al. and Smith et al. have been explained above. To provide the system as claimed would have been obvious in view of either one of Koptis and Lustbader et al. in view of Smith et al. for the reasons given in the previous paragraph.

As to claims 16 and 20, to impregnate the pad with hair removal solution would have been obvious in order to facilitate applying to the skin.

As to claims 17-18, Smith et al. disclose the pad to be of a porous material (see col. 5, lines 43-52).

As to claim 19, Smith et al. disclose a package including a third piece of material (the remainder of 12' and 12").

As to claim 21, Smith et al. discloses a second pad (22).

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. ('433). Disclosed is a method comprising providing a first pad (20), placing the pad in a first pouch formed between first and second pieces of material (14 and 12') and sealing the first pouch. The reference to hair solution is just that, no inclusion in the method.

As to claims 17 and 18, Smith et al. disclose the pad to be of a porous material (see col. 5, lines 43-52).

As to claim 19, Smith et al. disclose a package including a third piece of material (12').

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are solution application systems including packaged pads.
